WORK EXPERIENCE

Trianz Digital Consulting Pvt Ltd | Bangalore JAN 2021 - PRESENT
Senior Technical Lead

- Developed and maintained full-stack web applications using Node.js, React.js, PHP (Laravel), and Python, MERN Stack.
- Collaborated with project managers to gather requirements, define scope, and plan technical solutions.
- Led the end-to-end implementation of features and modules, ensuring alignment with business needs.
- Conducted code reviews to maintain code quality, enforce best practices, and mentor junior developers.
- Coordinated with QA teams for test planning, execution, and issue resolution.
- Implemented CI/CD pipelines using Jenkins, enabling automated builds, testing, and deployments.
- Deployed and managed applications on AWS infrastructure.
- Promoted best practices in code quality, test-driven development (TDD), and team collaboration.
- Utilized **Black Duck**, **Coverity**, and **Netsparker** for security analysis, open-source risk management, and static code scanning.

Ola Cabs | Mumbai Mar 2020 - Jan 2021
SDE - 2

- Designed, implemented, and tested a real-time monitoring web application to track the status of Entry-Exit machines across Delhi and Qatar metro stations.
- Built the application using Laravel, Node.js, React.js, MERN Stack, Socket.IO, STOMP.js, Java Spring Boot, MongoDB, MySQL, and Git.
- Implemented a queuing system to send and receive byte data in BLOB format using IBM MQ, Oracle DB2, and Java Spring Boot.
- Created and configured Red Hat Enterprise Linux 7 & 8 virtual instances, including offline package installations using repository sync.

LEARNINGS

- ML
- LangChain | LLM
- Rag | MultiRag
- Generative AI

DEVELOPER TOOLS & PRODUCTIVITY

- Cline | CoPilot | ClaudeCode
- PostMan | REST Client
- Visual Studio Code | Pycharm
- Docker

Living Consumer Products PVT LTD | Mumbai SEP 2015 - MAR 2020

Senior software engineer

- Designed, developed, and tested web applications and RESTful APIs using Laravel, PHP, Node.js, React.js, MongoDB(MERN Stack), and MySQL.
- Implemented a real-time chat application using Node.js, Socket.IO, jQuery, MongoDB, and Git.
- Installed and configured Ubuntu and CentOS instances on AWS and GCP cloud platforms.
- Contributed to the development and enhancement of in-house products including Wift, iCrushiFush, and Xena.

MineBitz Softwares | Kerala

AUG 2012 - SEP 2015

Junior software engineer

- Developed modules for ERP solutions using PHP, MySQL, jQuery, HTML, and CSS.
- Built various websites, admin panels, and web applications using AngularJS, PHP, jQuery, and MySQL.
- Developed custom WordPress plugins to extend site functionality and improve content management.

PROJECTS

1. WorkBench Bond | LibertyMutual Client | Jun 2026 - PRESENT | <https://www.libertymutual.com/>

The Surety WorkBench application at Liberty Mutual is an internal digital platform and underwriting system used by staff and agents to process, manage, and evaluate surety bonds with major modules like Bond Request & Execution Module, Billing & Financial Integration Module etc..

TechStacks : NodeJs, NestJs, ReactJs, Jenkins, AWS

2. SmartSolve | Netapp Client | Jun 2024 - Jun 2026 | www.smartsolve.netapp.com

SmartSolve is a NetApp Partner Tool featured within NetApp's Toolbox. It's primarily used to analyze and troubleshoot AutoSupport (ASUP) data—logs and diagnostic information from NetApp storage systems—by parsing, aggregating, and visualizing it for support and assessment tools of Ontap storage OS.

TechStacks : NodeJs, ReactJs, PHP, Laravel, Python, Jenkins, AWS

3. IQPC | US Client | Jan 2021 - Jan 2023 | www.iqpc.com

IQPC (International Quality & Productivity Center) is a global event services company specializing in business-to-business (B2B) conferences, exhibitions, exchanges, and digital events aimed at executives and professionals. Here's a breakdown of what they do:

TechStacks : NodeJs, ReactJs, PHP, Laravel, AWS

4. ControlDock | Trianz Internal Tool | Jan 2023 - Jun 2024

A web application tool for Incident, Asset, ACL management.,

TechStacks : ReactJs, PHP, Laravel, AWS

5. Ridlr | OlaCabs | Jan 2021 - Jan 2023

An application for metro ticket booking and a real-time monitoring platform to track the operational status of entry and exit machines at metro stations in Delhi and Qatar.

TechStacks : Node.js, React.js, Socket.IO, STOMP.js, Java Spring Boot, MongoDB, MySQL.

6. Xena | Living Consumer PVT LTD | Jan 2020 - Jan 2021 | www.xena.livingconsumer.com

Xena is an AI-powered marketing technology platform designed to optimize digital advertising and campaign performance across multiple channels.

TechStacks : NodeJs, ReactJs, PHP, Mysql, MongoDB, AWS, GCP.

7. WIFT | Living Consumer PVT LTD | Jan 2018 - Jan 2020 | www.thewift.com

WIFT is an AI-driven tech job search and candidate matching platform created by Living Consumer, focused on technology and IT industry roles in India

TechStacks : NodeJs, ReactJs, PHP, Mysql, MongoDB, AWS, GCP

8. iCrushiFlush | Living Consumer PVT LTD | Sep 2015 - Jan 2018

iCrushiFlush is a mobile-first, location-based casual dating app designed by Living Consumer Products, aimed at helping young adults connect and interact in a secure, playful manner

TechStacks : NodeJs, ReactJs, SocketJs, PHP, Mysql, MongoDB, AWS, GCP

9. Temple Management Web App | MineBitz Softwares | 2012 - 2015

Digitize daily operations of religious institutions. The platform simplifies devotee engagement, event scheduling, donation tracking, and puja service bookings through an intuitive web-based interface.

TechStacks : PHP, MySql, Html, Cssl

10. School Management Web App | MineBitz Softwares | 2012 - 2015

A System to automate academic, administrative, and communication tasks across schools and educational institutions.

Key Features:

- Student Information Management – Centralized student profiles including attendance, grades, behavior, and performance tracking.
- Teacher & Staff Management – Assign classes, manage timetables, leave records, and performance reviews.
- Timetable & Attendance – Auto-generate class schedules and monitor daily attendance for students and teachers.
- Fee Management – Configure fee structures, generate invoices, and enable online/offline payments with receipt tracking.
- Exam & Report Cards – Manage exams, evaluate results, and auto-generate report cards and progress reports.
- Parent & Teacher Communication – Secure parent portal for real-time updates, circulars, and messaging.
- Library, Transport, Hostel Modules – Optional add-ons for managing physical resources and infrastructure.

TechStacks : PHP, MySql, Html, Css
